INTRODUCTION:

At Greenland Services we strive to create unique and original landscapes that differ from the ones commonly found in Pakistan. We can design your new landscape or recreate your existing one with a variety of plant life and seasonal splashes of color. We take personal interest in making sure your landscape or garden blooms is maintained so it has the groundwork to reach its maximum potential. We have a well trained staff on site to implement the techniques we have developed since 1982.

Greenland Services uses only the highest quality materials for which we go out of our way to find them. We have networking and acquaintances with all the plant nurseries, landscape material & irrigation suppliers within or outside Pakistan.

Greenland Services is running independently with its own network of plant nurseries, tied with other services also to engage all types of customers that can be viewed on our website "www.gls.pk"

SERVICES

Greenland Services strive to make its designs more diverse by using a wider variety of plant material than what is typically found in regular landscapes. By incorporating annual and perennial accents in selected spots in the landscape to provide color without being pretentious. We also incorporate many different types of foliage for more visual impact as observed easily in the beautiful image given in this profile.

We prefer to design plants that will not out grow their surroundings. This method reduces pruning and possible deformation of plants over time. Once an outline scheme has been agreed, we prepare all of the working drawings and detailed specification needed to build your garden.

These drawings are prepared using Auto CAD and includes the Master Plan and all of the layout plans showing the setting out of both hard and soft landscaping depending on requirement. A budget estimate is then prepared.

DRAFTING SERVICES

We provide drawings for most disciplines of drafting: All types of Engineering, Site Plans, Floor Plans, etc. Accurate field measurements can be provided or can work from a sketch. We generate the drawings and send them back to you in a friendly format. We have our own CAD experts who work for us equipped with the latest techniques, beautiful landscape designs and garden styles.

MAINTENANCE SERVICES

Maintenance Services includes mowing, edging, trimming of lawns & blowing hardscapes. Once the lawn/garden/patio is being design by us, we make contractual agreements for maintaining the gardens for which we provide gardeners and supervisors to look after the garden on frequent basis.

FUMIGATION SERVICES

We provide fumigation services on monthly bases and the fumigation experts are hired by the companies to do fumigate their lawns according to costumer requirements.

CAPACITY BUILDING OF GARDENERS

We train the outside staff also by signing a contract depending on the requirement. We have credit history of training staffs of several corporate offices, schools and colleges. We build the capacity of the staff gardeners to take care of the lawn on its own.

FARMING & IRRIGATION SERVICES

We provide farming and irrigation services for farmers to irrigate their lands, we also have farms running under Greenland Services which are irrigated on large scale.

PLANT NURSERIES

We have 2 plant nurseries where plant lovers can come, visit and get the plant of their own choice. Our sales representative are present to assist them, as to which plant will best suit their requirements, with what to buy and how to take care of it.

TRANSPLANTING TREES

We are experienced in transplanting of fruit trees, coconut / date palms, ornamental trees etc for making quick landscapes.

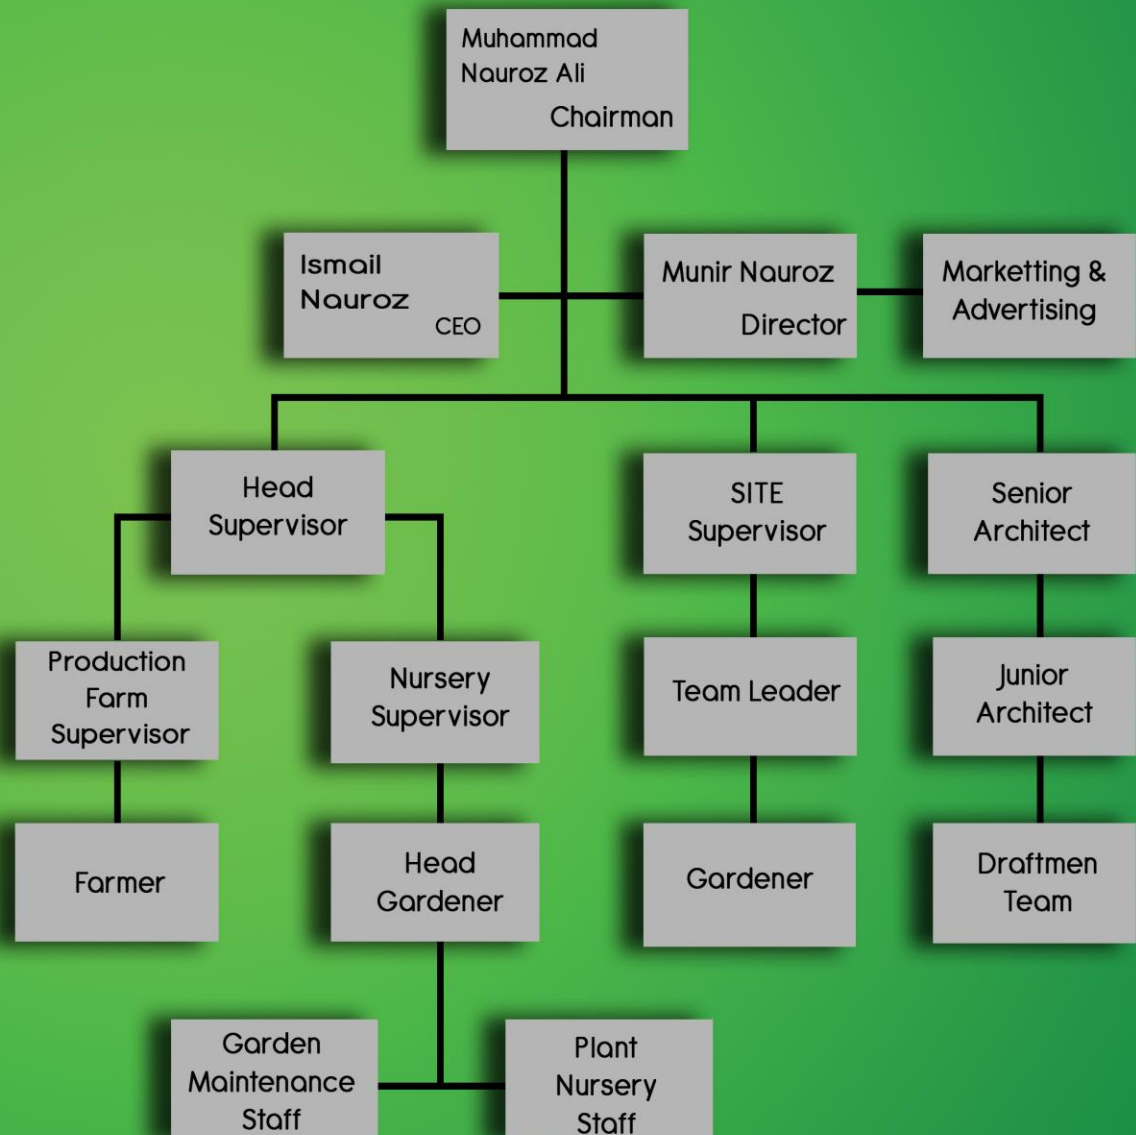

AGRICULTURAL DEPARTMENT

It is an agro-technical oriented firm with PhD's and agriculture research scientist working as advisors and staff of high skilled and expert agricultural graduates and post graduates to help you out from step of buying, to the last step in which your land or agricultural business will turn into highly profitable business.

Assistance we can provide:

- * Agriculture advisor.
- * Agro-technical assistance.
- * Manage your land or agricultural business with the help of highly skilled staff.
- * Supervise your entire agricultural operation on your behalf.
- * With most latest agriculture equipments i.e. tractors, plugging equipment, trolleys, bulldozers, threshers and various types of agricultural machines on rent or sale basis.
- * With certified seeds for high yields.
- * Field sprayed.
- * Check and take preventives steps on crop disease and advice you other preventions.
- * Turn your lands in lush green landscape by help of agricultural experts.
- * Laboratory facilities available for soil testing water testing and disease diagnoses.
- * Establish fish ponds, shrimp ponds, cattle farm, goat and sheep farms, dairy farms and poultry farms for you.
- * To obtain loans and other facilities from banks and other government agencies.
- * In buying, leasing and selling your agricultural lands and business.
- * Skilled staff or can train your staff to perform various agricultural jobs.
